

# ALL IN-ONE IoT

Delivering  
IoT solutions  
tailored to  
your needs

# POWERFUL RESULTS FOR ANY BUSINESS CASE

## SMART

## WATER METER

## WASTE MANAGEMENT

## PARKING SOLUTIONS

ANY INDUSTRY

Utility companies, industrial facilities and municipalities.

Municipalities, Real Estate, Facility Management companies.

Commercial Buildings, Mall & shopping centers, Garages, Airports, Universities.

UNIVERSAL APPLICATION

MID certified. Suitable for indoor and outdoor placement.

Monitor various waste types (residential or commercial) across any bins or container.

Install on any ground surface, on-street or off-street, indoor or outdoor.

REDUCE COSTS

Power Consumption, Labors costs and Pipeline maintenance Leakage minimization.

Energy and fuel consumption, size of truck fleet and number of waste bins.

Traffic congestion, gas emissions, maintenance and compliance force.

SUPERCHARGED ROI

Control water resources efficiently. Improve High accuracy readings, Gain insights on consumer consumption.

Manage waste-cost efficiently, contribute to the environment, Improve the wellbeing of people.

Optimize inventory occupancy, maximize citation revenue, boost driver satisfaction and repeat business.

# OR ANY OTHER CUSTOMIZED SENSOR

# PIONEERING TECHNOLOGY

## LoRaWAN & NB-IoT

•LOW COST•HIGH AUTONOMY•WIDE RANGE•HIGH SCALABILITY•

### HARDWARE SENSORS

Select from a range of ready-made sensors, or we can supply you with custom designed sensors to fit your needs.

Monitor and connect any asset using low power sensors and leverage LoRAWAN or NB-IOT network for excellent coverage.

Achieve high ROI with any customized sensor due to the low-cost deployment.

### GATEWAY

Regardless of the size of your application, Cicicom will implement and configure the network to meet your needs.

Aggregate data in real-time using LoRaWAN.

Scale your IOT network by simply plugging new sensors with no additional infrastructure costs.

### CLOUD

With our streamlined cloud integration capabilities we ensure a flexible and secure IOT deployment.

Collect and aggregate sensor data.

Expand through pay-as-you-grow for resources you use.

Maximum performance through high-availability.

### PLATFORM

Augmented intelligence through processing data into actionable insights.

Simple to use web interface.

Remote device control.

Data visualization dashboards.

[cicicom.gr](http://cicicom.gr)

Cicicom is at the forefront of developing new technologies that improve business performance in the digital & connected era. Our engineering architects take an end-to-end systems approach to hardware, firmware, software, web and apps specification, design and integration.

Cicicom has extensive experience in delivering large-scale customized solutions and partnering with OEMs and infrastructure providers within the Energy, ICT, Logistics, Retail, Utilities and local government sectors.

Cicicom is pioneering a new generation of IOT solutions based on Low-Power Wide Area Networks (LoraWan & NB-IOT) that provides powerful functionalities for data collection, monitoring, and insights generation for any asset, or across any industry.

We are the only vendor that combines hardware sensors, software architecture, cloud services deployment, into a single all-in-one IOT solution. Already, we have implemented smart water meters, waste management, and intelligent parking solutions for a range of customers. Cicicom's all-in-one IOT enables clients achieve better business decisions, increase productivity and reduce operational costs.
